PRE-SHIPMENT INSPECTION REPORT

Fullbax

Client:	-	OVERALL RESULT	Pending
Report number:	FBX-05-2023-41306		
Inspection Date:	2023-05-14	Page 15 of 30	

Marking check

- Check the content of marking on packaging, instruction manual and product (including text, picture and logo)
- Incorrect marking, missing marking or marking is not well fixed (Major)
- Missing destination country language (Critical)
- Missing Country Of Origin on product or packaging (Such as Made In China) (Remark/Obs in report)
- If defects affect product safety (Critical)

-For **European market**, the symbols of below must be measured (**The measurement to 3pcs per item**):

-For Toys: Measure the diameter of "Not for 0-3ages" symbol , it must be minimum **10mm**

-Measure the height of font "CE" mark , it must be minimum **5mm** height

-Measure the height of Class II symbol "II", it must be minimum **5mm** Height/Width

-Measure the font height of Warning, it must be comply with below:

-For UK market, Measure the height of font "UKCA" mark, it must be minimum 5mm height

UK
CA

-For Russia market, Measure the height of font "EAC" mark, it must be minimum **5mm** height

EAC

-Measure the dimension of WEEE symbol, the minimum dimensions should comply with below:

(For WEEE logo: Please Observation in report, but no need to Failed if below issue found):

1. If found no bottom bar on WEEE logo.
2. Dimension of WEEE logo is not same as above description.

Standard: The height of CE is 5mm, the distance between C and E is 3.5mm as above photo.

Actually: The distance between C and E will be increased once the height is increased.

Measurement as below:

Step 1: Measure the height of CE as "H"

Step 2: Measure the distance of "C" and "E" as above photos as "D1"

Step 3: Calculate the distance of "C" and "E" per standard as "D2" = $3.5 \times (H/5)$ mm

For example, if the height of CE is 6.5mm, then the standard distance $D2 = 3.5 \text{mm} \times (6.5/5) = 4.55 \text{mm}$.

Step 4: If "D1" is same as "D2" then it is Passed, if not, OBS this in report.

PRE-SHIPMENT INSPECTION REPORT

Fullbax

Client:	-	OVERALL RESULT	Pending
Report number:	FBX-05-2023-41306		
Inspection Date:	2023-05-14	Page 16 of 30	

Package check

- Check product and transportation packaging.
- Dirt Stain, deform, broken, poor sealing, marking blurred but still can identify, poor sticking or wrong position of label , foreign object , glue mark (Minor)
- If defects affect product function and sales (Major)
- Hair,wet, marking blurred can not identify, bad smell, wrong packaging method(gummed tape, ply of corrugated paper,etc) ,missing label (Major)
- If defects affect product safety (Critical)
- Sharp point, sharp edge, mold, insect, metal clip for banding (Critical)
- For Toys and Children Products: If poly bag with an opening perimeter greater than 380MM that shall be have vent hole and warning "WARNING! Keep this plastic cover away from children to avoid suffocation" (Critical)

Dimension check

- Check the packaging (pallet, export carton, inner carton, sales packaging, etc...) and product (overall size,key size of product, size marked on packaging, ect...) dimensions.
- Compare the actual dimension with provided dimension (by package/product/customer information)
 - Provided dimension \leq 1cm, tolerance +/- 5%;
 - Provided dimension \leq 10cm, tolerance +/- 4%;
 - Provided dimension \leq 100cm, tolerance +/- 3%;
 - Provided dimension $>$ 100cm, tolerance +/- 2%
- If actual dimension out of tolerance, Major and record the data.

Barcode / QR code check

- Labeling position of barcode / QR code mismatching to customer packaging information. (Critical)
- Barcode /QR code could not be reading, incorrect barcode /QR code reading or missing barcode / QR code. (Critical)
- Barcode /QR code label lifted up or poor adhesion. (Major / Minor)
- If the barcode /QR code is more than 1pc on packaging, the barcode /QR code check should be do for each barcode /QR code according to required sample size.

Product weight check

- Check the product net weight and record data.
- If product data provided, measured weight is out of tolerance +/-5% (Major)

Moisture content check

- Check the wood moisture by moisture content tester according to wood category.
- Wood: 7 - 14%
- MDF: 4 - 11%
- Particle Board: 5 - 13%
- Plywood: 6 - 12%
- Bamboo: 7 - 17%
- Rattan: 7 - 14%
- Allowance measurement of moisture content::
 - Within \pm 2% of the limit = Minor
 - Over \pm 2% of the limit = Major

Verification of customer's specification

- Check the specification sheet provided by customer, any difference should put on "Special Attention" or "Observation" of report.

Smell Test

- The product should be in nature constructions/forming with nature smell
- With bad smell when open the packing (Major/Critical)
- Keep the samples without packing for 30minutes, still with bad smell (Major/Critical)

Appearance check-Raw bamboo/wood

- The appearance check must be conducted under good optical light conditions, refer to below:
 - Under natural light or illuminance 300-600LX which close to natural light (like 40W fluorescent lamp (daylight), inspection in a distance approx. 500mm), make the inspection in the location where the sight and optical light to the inspected surface in 45-90°.
- Checking product appearance
- The appearance check must be conducted under good optical light conditions.
- Sharp point, sharp edge, mold, insect, crack on structural parts (Critical)
- Minor if defect is visible at distance 30cm;
- Major such defect is visible at distance 100cm.
- Critical defect is a hazardous defect or leading to unsafe conditions for individuals.
- If defects affect product function and sales (Major)
- If defect affect safety. (Critical)
- Free of broken, cracked, wormhead, wormhole, hole, mold, abnormal bendin, insect.

Certificate of fumigation check

- For materials such as solid wood and bamboo, the supplier should provide a valid fumigation certificate.

Note: 1. This report does not evidence shipment but only finding at the time & place of inspection or inspected units randomly selected. 2. This report does not relieve the factory from its contractual obligation with regards to quality, quantity, reliability or compliance to relevant standards of this lot, nor does it prejudice buyer right of claim toward the factory for compensation for any apparent and/or hidden defect not detected during this random inspection or occurring thereafter. 3. The contents of this report can't be reproduced. 4. The defect labels with "1cm" marking of defect photos are only for identification purpose, not parts of product.
